Outline

- Introduction
- Basic Idea and Challenge
- The BWL (Bird Watching Learning) System
- Formative evaluation
- Conclusions

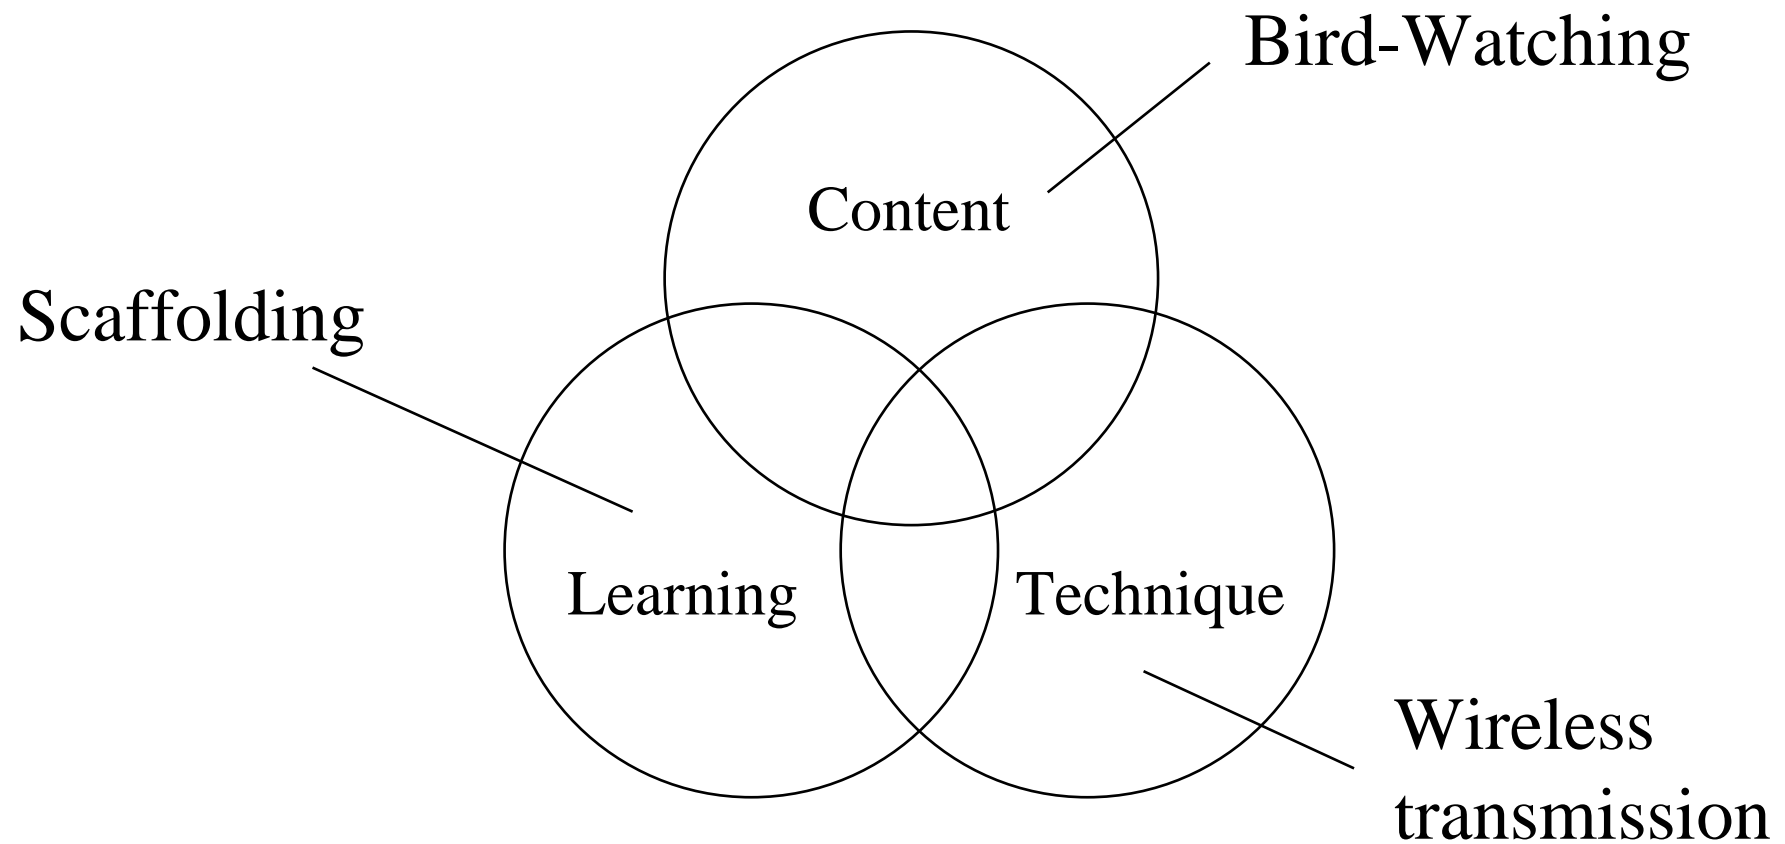

Introduction

- This is a project result
 - Sponsored by the Ministry of Education,
Taiwan: #90A-H-FA07-1-4
- The project aims to develop a mobile bird-watching activity based on the wireless techniques.

Knowledge Domains

Learning flow of outdoor group learning -- mobile bird-watching learning as an example

1 Preparation

2 Create an ad-hoc classroom anytime and anywhere

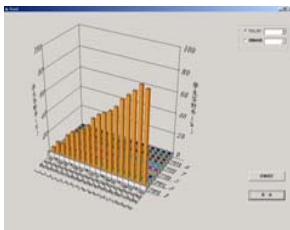

3 Pre-evaluation An ad-hoc classroom

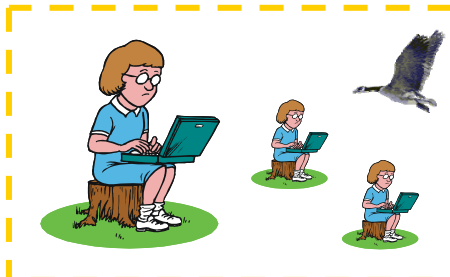

4 The mobile bird-watching activity

7 The learning result (from an analysis table)

6 Post-evaluation An ad-hoc classroom

5 Mobile learning (wireless query from a bird-database)

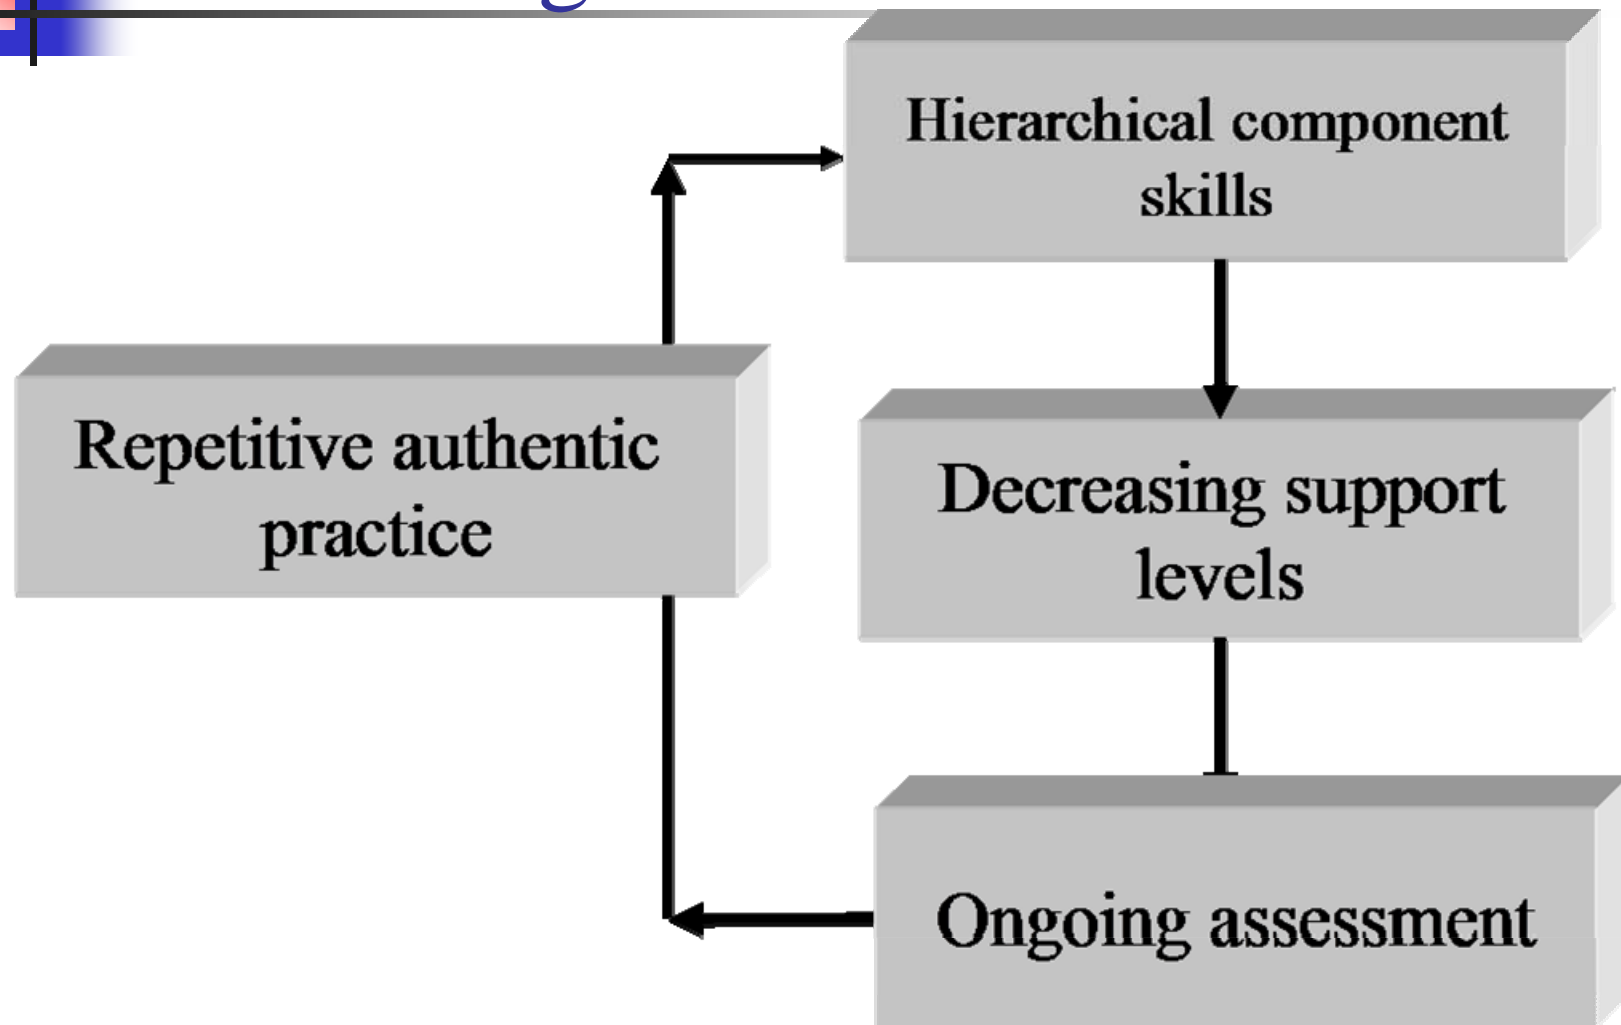

The Elements of Scaffolding

- Hierarchical component skills
- Decreasing support levels
- Repetitive authentic practice
- Ongoing assessment

A simple loop is used to combine all scaffolding elements

The BWL system

The scenario of a bird-watching activity

The Implementation of Scaffolding-Aid Model

- Implementation of Hierarchical Component Skills
- Implementation of Repetitive Authentic Practice
- Implementation of Ongoing Assessment
- Implementation of Decreasing Support Levels

Implementation of Hierarchical Component Skill

- The bird-watching and searching interfaces

(a)

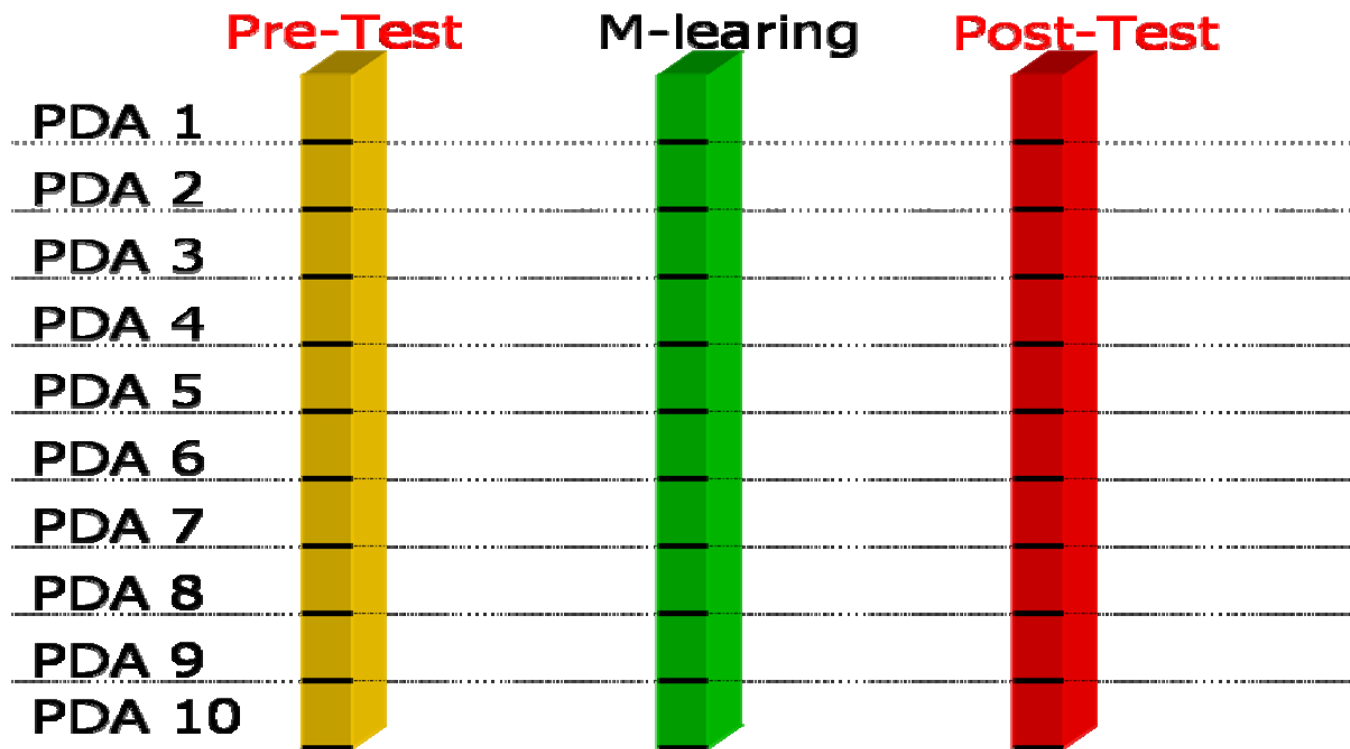

(b)

(c)

Implementation of Repetitive Authentic Practice

- Three tests in a bird-watching activity

Implementation of Ongoing Assessment

- The Bird-question assignment interface

行動學習單-老師

鳥名:

屬性 1:

屬性 2:

屬性 3:

屬性 4:

屬性 5:

屬性 6:

最多可儲存十隻鳥，你已儲存:

黑面琵鷺

儲存

確定 結束

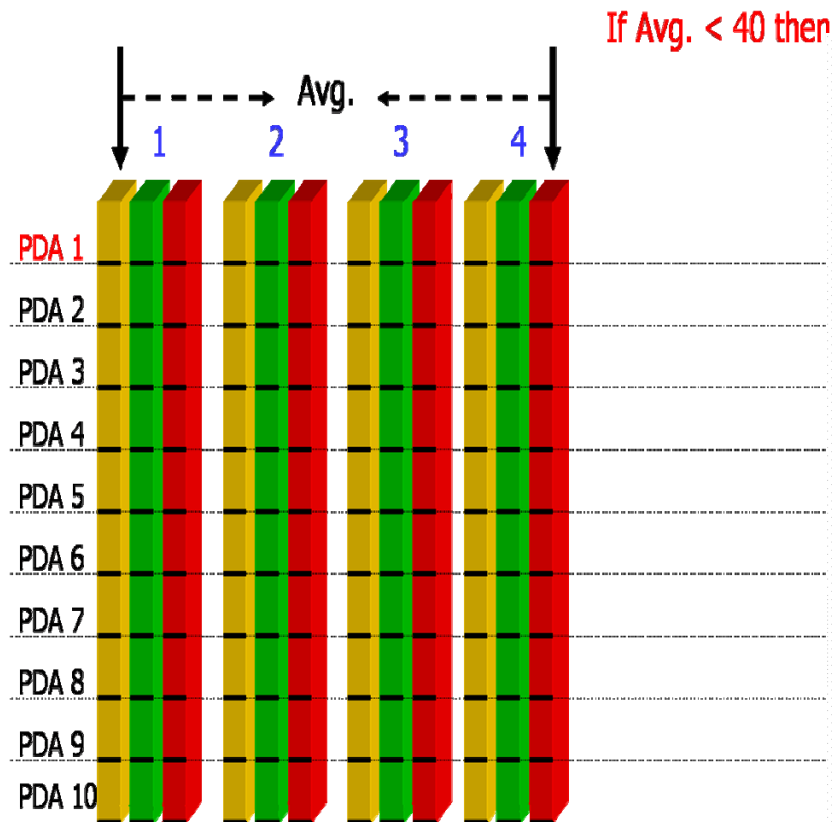

Implementation of Ongoing Assessment (cont.)

- The wireless bird-answer interface

Implementation of Decreasing Support Levels

- The example of decreasing support levels

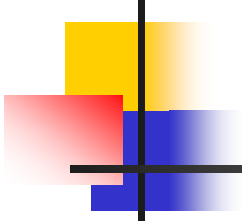

Formative Evaluation and Statistical Results

- Affective Domain : Feelings & Values
 - PDA as Tool for Mastery Learning— Hsi-Men at Tainan

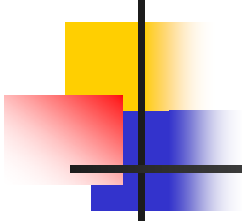

Questions	Highly Agree		Agree		No Opinion		Not Agree		Highly Not Agree	
	f	%	f	%	f	%	f	%	f	%
The activity is interesting	16	29	27	49	5	9	5	9	2	4

Formative Evaluation and Statistical Results (cont.)

➤ PDA as Tool for Discovery Learning— Chang-Hsing at Keelung

Questions	Highly Agree		Agree		Not Agree		Highly Not Agree	
	f	%	f	%	f	%	f	%
Birds are creatures with wisdom	13	50	11	42	2	8	0	0
Birds are creatures with motions	13	50	9	35	3	11	1	4
The Environment for birds has been destroyed	14	54	3	11	7	27	2	8

Formative Evaluation and Statistical Results (cont.)

- PDA as Tool for Individualized Learning—Ming-Tao at Taipei

Response	f	%
Interesting	19	86
Expecting	1	5
Nice environment	1	5
No response	1	4
Total	22	100

新科技賞鳥 e點靈

多位教授開發即可選點「鳥類辨識系統」大大好用

黃文杰／中壢報導

由中央大學許健平教授、台北大學陳裕賢教授及東華大學高台蒨教授共同主持執行的「戶外鳥類生態學習教室計畫」，將新科技的無線網路技術和傳統的戶外教學活動，做了完美的結合。

所謂「戶外鳥類生態學習的計畫」，主要是延伸了未來教室學習的理念，將無線通訊技術結合PDA，應用在國小的戶外賞鳥教學活動中，發展出一套可供學童立即近觀、立即點選、立即查閱的「鳥類辨識系統」。

目前該計畫經廿多所國民小學申請，由專家審慎評估後，結果選出南市西門、基隆長興及北市明道三所小學進行下一階段學習實驗工作，讓專家、同儕和教材做快速有效率的互動。

以北市明道國小為例，由於具備關渡雁鴨公園及華江橋雁鴨生態的豐厚優勢，在眾多學校脫穎而出，尤其該校自然科黃麗珠老師有完整的賞鳥經驗，在她帶領下，學生學習效果將不輸一般野鳥協會專家。

南市西門國小更是成果豐碩，在林勇成老師用心經營下，該校建立完善鳥類生態學習網站，尤其該校自製的戶外鳥類生態教學影片參加教學媒體競賽，榮獲台南市第一名殊榮；長興國小在PDA的操作上更驚人，小朋友皆可正確下達指令，順利達成老師的要求，尤其黨科鳥類觀察是全國最佳的地點。許健平教授指出，使用PDA來輔助戶外賞鳥活動，有許多功用是傳統的鳥類鑑賞教學所

無法比擬的，學生樂在其中，運用新科技享賞鳥之樂，可以作為九年一貫教育之跨學科的主題式教學活動。

計畫近期內將對資料庫內容完整性、動態影像檔之無線擷取與傳輸、行動學習單的輔助與利用，做進一步的探究，可望以新科技為未來教育型態與方式帶來啟發和創新。賞鳥網址：<http://bird.educities.org>
